

## DNNCon

Make sure you've marked your calendars for [2014's DNNCon](#), which will be held on November 7th & 8th in sunny Palm Beach, Florida!

## People's Choice CMS Awards

The DNN Platform is nominated for Best Free .NET CMS and Best Open Source .NET CMS in the 2014 awards, while DNN Evoq Content is nominated for the Best Small to Midsize Business .NET CMS. Check out why [DNN Partners and Store Vendors](#) and Community member [Geoff Barlow](#) voted, then [cast your vote!](#) Voting will run through October 17, 2014 at midnight MST.

## Message from Joe Brinkman

September was a very busy month for the DNN Community. We created new working groups to help focus on particular community areas, we launched a new [Community Hangout series](#), we had another strong month in the [Community Blogs](#), and we put the finishing touches on a brand new [7.3.3 release](#). Everywhere I look in community today, I see a renewed commitment to the platform and an even greater energy level than we have had in a few years - and this was just the beginning.

I had a chance to meet with all the new working groups this past month and I know that there are a lot of great things being planned for 2014 and 2015. In the coming weeks you can expect to read more about these plans in the Community Blogs. Rather than waiting to read about the coming changes, now is your opportunity to participate in making those changes happen. Help make community come alive by volunteering to be a part of the training, website or localization groups or even heading up a small feature project based on something listed in Community Voice. Attend the [Community Hangout](#) later this week or register to attend [DNNCon](#) next month in West Palm Beach. Community belongs to all of us and it is up to each of us to do our part to make this a community of which we can all be proud.

Joe Brinkman  
Co-Founder & VP of Technology & Community Relations

## Community Hangout

[Cool Skinning Tricks for DNN](#)

**Date:** Thursday, October 2, 2014 | 12:00 - 1:00pm PDT

In this hangout, we'll be talking to Tracy Wittenkeller. Tracy has been skinning DNN since it was released and he'll be going through some of his cool skinning tricks, including: menu content injection (DDR menu add-on) and having a flexible logo for different skins and devices looking at your site.

## Upcoming Webinar

[Building Your Business Case for a Branded Online Community](#)

**Date:** Tuesday, October 16, 2014 | 9:00 - 10:00am PDT

In a research report conducted by DNN, 79% of respondents view branded, online communities are a "critical channel" for their marketing efforts. But how do community advocates gain the necessary budget and approval to launch an online community for their organization? Online community expert Vanessa DiMauro will show you the way.

[How to set-up the Image Manager? I could not add a new folder nor upload a picture.](#)

Hi there! I am currently on dotnetnuke 07.02.02. It seems that the image manager when using the HTML module to edit content doesn't work at all. We could not add folder, nor add an image. Is there anything we need to set-up first to make it work? I am new to DNN. Your help is much appreciated.

[Does Core Events Module Offer PAID Registration?](#)

I see within the setting of the module that there is a choice for paid registration via PayPal. I have not tested this myself yet but am hoping someone on here has and/or has implemented it. If so, how is the process? Does it work well to accept paid registration for events?

## Top Discussions from Community Forum

[Suggestion for next HTML Template visualizer](#)

I have a couple of suggestion to improve the built-in HTML Template visualizer in next releases:

- Provide some mean of adding an header and footer section before the HTML repeater.
- Give some mean of checking if a field is empty/null to have some section display conditionally.

[Cannot Activate CAPTCHA For Registration](#)

Hello, I just updated to the newest DNN version. For one of my sites I want to 'Activate CAPTCHA For Registration' (admin/site settings/user account settings). But this is not working/possible. For other sites (portals) there

and writing settings.

[Add page setting for injecting scripts into a page through the Client Resource Manager](#)

There needs to be a better way to inject scripts (javascript and css) into a page. Page settings should have functionality exactly similar to Engage's JackRabbit module where you can add scripts and select where to inject them and the priority for each.

[@David O'Leary](#)

[Add more than one module at a time to a page](#)

I find dragging one module onto a page at a time to be a very slow process. I think the current menu could be enhanced so that a checkbox could be checked and then all the modules could be placed on the page at once. I think this would drastically ...

[Create A DnnCMS TV Channel with DnnHangouts](#)

With the start of the DNNHangouts that Will is doing, maybe it is a good idea to create a page under the 'Community' menu called "DnnCMS TV" with all the episodes of the DnnHangouts to be found. This would generate community traffic every month to view ...

[DNN 7.3.3 Released](#)

I am pleased to announce that DNN Platform 7.3.3 has been released. The 7.3.3 release was a stabilization release. One of the highlights for this release was the significant number of pull requests we received from community members.

### [7.3.2 New Install; Admin User; File Management Issue](#)

Created a brand new virtual web server. Installed DNN 7.3.2 new install. Opened up the site with the host account and created an admin user. Logged in as that admin users and went to Admin -> File Management. The admin user can't do anything or see any files. Everything works perfectly for the host account.

### [Content Localization Walkthrough](#)

In a world that gets smaller every day, it becomes more important every day to be able to serve the content of your website in a language that people actually understand...The DNN Platform can help: there are a number of features that make it easy to create a multilingual site. Localization is very complex though, so, let's go over a few tips and tricks!
