About the Client

dnnZONE DnnZONE Web Services consists of a team of professionals, in the technology field, who operate in the purchase of website development companies.

The Need

A way for users to manage their own files (sometimes hosted in cloud storage providers), and isolated from other users.

The Solution

DNNUserFiles provides all the features required by the solution, being its “Dynamic Root Folder” feature a key point to keep users isolated.

Some use cases solved by DNNUserFiles:

- Without login or registration you cannot download files.
- With login or registration you take access to download files.
- You can share content to groups using DNN group policy.
- Ability to host the files in cloud storage providers, via DNNGlobalStorage.
- Ability to provide Greek and English UI (DNNUserFiles templates are fully localizable and sensitive to the current user’s language)

DNNGlobalStorage | Easily tie-in cloud-based, external file systems

DNNGlobalStorage expands your DNN and Evoq storage options beyond your Web Server, enabling a seamlessly integrated way to have your files wherever you want.
