

## DNN Platform 7.2.2 Released

The latest iteration of the DNN Platform was [released on March 19, 2014](#). This was a quality-focused maintenance release and represents a substantial amount of value for customers and platform users with more than 225

### Message from the Founder

After much internal consideration we have ultimately decided that all new DNN platform development going forward will be done in Java. Java is a very capable enterprise platform and it allows you to do almost all of the same things that are possible in ASP.NET. We are going to miss Visual Studio but we hear that if you are good at writing software then you really don't need anything more powerful than Notepad. We also believe that our migration will help increase the lagging market share for Java technology so that it can get more developer attention and potentially compete with the Microsoft development stack. If you have any feedback or opinions regarding our recent technology decision, please feel free to send it to

items resolved.

## DNN Platform Training

Pluralsight offers a rich library of full-length online training courses for developers and IT pros. I am pleased to mention that [Charles Nurse](#) has created a comprehensive course that covers the [DNN Fundamentals](#).

[aprilfools@dnnsoftware.com](mailto:aprilfools@dnnsoftware.com) - we would love to hear from you!!

## Top Questions from Community Exchange

### [Footer Modules Being Copied Many Times On Page Creation](#)

Running DNN 5 website, everything has been fine for ages. I had two modules in the footer for Contacting Support and Links to other Apps. They were created on the home page and set to "Display on All Pages".

[@NetBoySteve](#)

### [Host Setting Email Validation](#)

I am trying to configure DNN to send host emails. The Host Settings / Host Details screen comes up with and invalid email address response.

[@jstewart\\_au](#)

### [DNN 7 Uses A Lot Of Memory](#)

After the install of DNN 7 it uses a lot of memory (497MB). My hosting company limit app pool memory usage to 500MB.

[@azarbara](#)

## Top Ideas from Community Voice

### [Make 51 Degrees an Optional Provider](#)

Seems like the 51 Degrees stuff should be an optional provider rather than an inherent part of DNN.

[@davido](#)

### [Use VSDocMan instead of Sandcastle to create better DNN Documentation](#)

The reasons are more complete and more user friendly documentation.

[@Tony2009](#)

### [Phase out the use of Telerik controls](#)

The Telerik controls served a good purpose a few years ago but with the advancements in jQueryUI which is already in use, it seems many of the things we currently use Telerik for could be replaced with much cleaner and lightweight jQuery based solutions.

## Top Discussions from Community Forum

### [Problem In Html Module Accessing Settings](#)

After upgrade to 07.02.01 it is impossible to get access to Settings in HTML Module. I have no icon at the top right

[@mic](#)

### [Scheduler Behind The Scenes](#)

Is there any documentation of how the scheduler works exactly? My problem is that it seems to fire more than one of my custom scheduled jobs at once.

[@nilsh](#)

### [Expectations For Commercial Modules And Skins](#)

Is it just me or do consumers has a right to expectations about modules and skins they purchase - and what should we as a community be doing about assisting them?

### [Creating a DNN Installation on Windows Azure Websites](#)

If you haven't yet tried out Windows Azure Websites I think you're missing out on a great product. Windows Azure Websites is an Azure technology designed to make it simple and fast to deliver – well, websites.

[@brucerchapman](#)

### [DNN Performance and Scalability: 1 - Introduction](#)

While we should always be thinking about performance and scalability when building applications, this year the DNN Platform Team is putting a much heavier focus than in the past in this area.

[@cnurse](#)

### [DNN Platform 7.2.2 Released](#)

The focus of this latest iteration was to provide tremendous value in the areas of reliability, security, performance, and user experience.
