

Case Studie

Website: <https://dodnn.work>

Public: Yes

Launched: 2017

Client: DoDNN.work

Platform: DNN

Contact: dnn@dekaleict.nl

SHORT INTRODUCTION ABOUT THE WEBSITE

The dodnn.work website is a community site targeted for two groups: DNN Experts and companies looking for DNN Experts.

This site is a site where DNN Experts can show their profile and give an overview of their skills.

Companies looking for a DNN Expert (to enhance their project, to solve a problem etc.) can post a project. The site then will send a message to every DNN Expert with the requested skills to reply if they can help with the project.

FUNCTIONALITY IN WEBSITE

This site contains a lot of functionality regarding searching and filtering. Visitors are able to search for specific experts and can also search for experts with specific knowledge or skills.

The site is build based on a theme from dnnconsulting.com and is using DNN Sharp modules like Action Grid, Action Form, MyTokens and Sharp Scheduler. For the news & blog section the DNN Blog module is used.
