## • Task

### DNN WEBSITE DEVELOPMENT

## Project Requirements

Triangular Care needed a professional website that conveyed a sense of wellbeing to their patients and clients. Additionally, it was crucial that they could upload an annual 'Statement of Purpose' and ensure it was easily downloadable for end users. The entire project had to be cost-efficient, aligning with their modest budget.

## The Solution

We designed and built a DNN website for Triangular Care using an off-the-shelf theme to maintain cost efficiency. The design was tailored to reflect the professionalism and care provided by Triangular Care, incorporating calming colours and intuitive navigation. The website included a straightforward system for uploading and updating the 'Statement of Purpose' annually, ensuring compliance with industry regulations and ease of access for users.

## The Outcome

Triangular Care is very pleased with the result, finding the website both professional and effective in conveying a sense of wellbeing. The new site ensures they are fully compliant with Care Industry regulations, as the up-to-date 'Statement of Purpose' is easily accessible for download by anyone who needs it. This cost-efficient solution has met their needs perfectly, enhancing their online presence while staying within budget.
